DESIGN

INNOVATION

SUSTAINABILITY

Portobello

Portobello

A look that crosses through matter and makes individuality emerge. The original ingredient for being yourself.

To rediscover yourself is also to find expressions that represent you. A unique environment brings elements of identity that build a story. The story of each one, two, of the house, of the city. Individuality and community converse and define the particular and the common. Dreamed up, shared, lived spaces. Spaces with biography. Unique spaces.

Portobello

What is inside matters. Your identity matters. Behind the scenes reveal the soul of the collection. We believe in the potential of the environment to accommodate attitudes and intentions. More than what is seen, that of which is special, the essence. Authenticity matters.

The materialization of the sustainable vision, of the conviction to create collectively, of the culture of innovation and the daily ~~of fashion~~ are synthesized in authentic solutions.

Authentic. Portobello 2023
Collection. Our essence for your identity.

Portobello Grupo

Portobello emerged in 1979 with a proposal of innovation and design, qualities that guide the company's actions and which evolved into a set of differentials that bring the ESG principles. A global player in the sector, the Portobello Group, a large corporation, has a multichannel operation, in addition to specialized retail, distributes its products to the main home centers, offers specialized service to major works, direct to construction companies and the real estate market, and is present on five continents through distributors and its own operations in the United States.

Its manufacturing parks, in Tijucas (SC), where its headquarters is located, Marechal Deodoro (AL) and Baxter (TN), bringing together modern facilities that reinforce the company's technological innovation, with the production of more than 42 million square meters in 2022, which is complemented by partnerships with manufacturers in Brazil, Asia and Europe.

QUALITY CE RTIFICATES

Portobello

The corporate and product brand of the Group represents the traditional operation of the floor and wall coatings trade, with headquarters next to the Tijucas industrial park in Santa Catarina and has a multichannel operation.

Portobello Grupo

Portobello shop

The group's retail unit has 147 stores, 25 of which are owned. It offers the most complete design experience in the world of ceramic tiles, accessories and the Officina Portobello.

Portobello America

A company with Portobello know-how and North American essence, creates, produces and distributes complete and competitive floor and wall coating solutions. Currently, it has two Distribution Centers, located in Florida and Tennessee, the headquarters of the company's industrial unit.

POINTER

Pointer is the leading design brand in the red body ceramics industry. With operations in the Brazilian Northeast, in addition to exporting, the unit took the concept of democratic design to the market for classes B and C.

P O R T O B E L L O E S G

We are aware of our actions and the consequences of our choices, with the responsibility of being agents of change in society and in the ecosystem in which we live.

Transparency and growing together express our relationships and the way we do business.

Our ambitions and actions make Portobello a Brazilian reference in ESG in our sector, with a strategic focus on Social, Environmental and Governance impact.

E

Do more with less, ensuring that the use of natural resources occurs in a regenerative manner, with emphasis on the management of raw materials, water and the neutralization of emissions and waste.

S

Guarantee an attractive, diverse and inclusive environment for the best talents, who deliver results of excellence, results and are protagonists in the social transformation of the communities in which we operate, sharing our values and knowledge.

G

Be more sustainable together, engaging the entire ecosystem, inspiring collaborators, suppliers, partners, customers and the community, with our structured, transparent and compliant governance as a differential.

COMPLETE SOLUTIONS

LASTRAS

Slabs represent a new paradigm for coatings in architecture, expanding the frontiers of the use of porcelain tiles, whether for projects and spaces, or for furniture design.

OFFICINA PORTOBELLO

Unique solutions and customization systems in the art of porcelain tiles with the essence of Portobello. Innovation, design and high-quality furniture, special cuts and decor.

PORTOBELLO DECOR

The translation of behavior and consumption trends into Portobello products. Design, textures, materials and technology are present in our collections focused on customization.

SISTEMAS

Great architectural projects combined with Portobello design and technology. Solutions in ventilated facades and special services.

NOVAS TECNOLOGIAS

Innovation is part of Portobello's DNA. New technology, new surfaces. The constant search to innovate and surprise.

materia_prima

To go back to the essence is to recognize the strength of origins. What comes first, what is the material that structures an architectural element?

Matéria_prima, essential material, traceable material, sustainable material. Pure earth. Pure water. Pure mixture. Pure clay. Matéria_prima.

The origin gives identity. It gives tones that nature embodies in earth. Nonetheless, it is not the same clay. There is a trajectory to every tone.

From land to architecture. They are processes that use fire to turn water and soil into ceramics. Simple and necessary for a world more in tune with nature.

Oskar Metsavaht has a look that transforms the obvious and essential into desirable and required aesthetics. Matéria_prima, what contemporary architecture expected.

Available in 20cm x 120cm and in the innovative 30cm x 120cm format, in 7 colors: neutro, ocre claro, ocre escuro, terracota, marrom, verde and azul.

Specially created for facades, matéria_prima is 100% porcelain and can also be used on interior floors and walls.

Our search for the essence of the earth has led us to a deep connection with matter in its raw state and revealed characteristics that opened up new possibilities for thinking about the concept of cladding.

Terralma brings the origin of the material that has the power to transform but preserves its essence.

A color analysis, starting from an immersion in the reconnection and identity trend, resulted in a vibrant palette of earthy tones, complemented by cool, nature-inspired nuances. The matte surface connects joints and special mortar in the same color chart to create a system of accessories for unique compositions.

In 9x37 longline format for floors and walls, Terralma infuses personality and inspires new forms of expression for unique environments.

URBAN MOOD

An authentic reinterpretation of urban elements that, together, unveil the plurality of large centers. Urban Mood is the balance between contemporary atmosphere and traditional references.

The reproduction of concrete in cool hues, in the democratic 80x80, is the basis of this concept. Groove, Brit, and Parkour have different surfaces revealing colors, textures, and reliefs, building up the possibilities for all areas in the house.

CONCRETE

BLOOMY

Each house has its own perfume, freshness, color, and texture. Bloomy represents the best feeling of being at home, when warmth flourishes, it emerges from the mix of choices that transform spaces into homes.

Neutral and welcoming in tones and surfaces, sophisticated and elaborate in details, surprising in the specific touches for each application, Bloomy is a system to wrap floors and walls in an atmosphere that invites you to stay.

The essence of the material is a fusion between the delicacy of marble and the contemporaneity of cement, which comes in glossy, satin, textured versions for external areas, in addition to the unusual weave of fabric carved on the surface.

Bloomy, to customize the whole house, to live in comfort and unpretentious sophistication. Available in 3 colors, Bloomy Off White, Bloomy Rope and Bloomy Fog, in nat, pol and ext finishes. Discover and fall in love.

CAPE COD

There are places that create unique lifestyles, a certain way of being unpretentious but also sophisticated, and with experiences that make it all worthwhile. Cape Cod, a peninsula which is north of New York, with houses in a style molded by its first inhabitants - local fishermen, blessed by the extensive coastline of golden sands, is one of these places.

Time and history unfold in Cape Cod as if nothing had changed, bearing the marks of simplicity and local authenticity.

Cape Cod, Portobello's new surface, is immersed in this atmosphere. A concrete that bears the marks of time, as if the wood of those pioneering houses left the spirit of living well behind. Soft, but with personality, Cape Cod invites you into a cozy environment, illuminated by warm colors and a texture that makes you want to touch it.

DANSK

The origins of visual purity, functionality, and formal simplicity are Eastern, but have been improved and conquered their own identity representing Nordic thinking. Portobello has Immersed in the daily life of Copenhagen, with the goal of capturing the essence of that culture. A team of Brazilian architects with the Portobello creative team immersed themselves around architecture and design, observed the cultural traditions and discovered Hygge - an untranslated word that expresses the Danish way of life, which values and promotes happiness and quality of life. The first Creative Collective Portobello collaborated in creating a collection of products that, in the eyes of the group, expressed the Hygge spirit. Metallic parquets with a brushed finish and soft colors represent the attention to details in the ambiances that look for simplicity, but without lacking form and beauty. Metal profiles express the attention to the design function, taken very seriously by the Danes. A mosaic of marble and metal, state that sophistication can also be present and celebrate the joy of living. The reproduction of a minimalist and almost single colored cement surface in warm tones translates the search for the essential and the comfort in living spaces. Light, one of the central elements of Hygge environments, is materialized in a candlestick developed by Oficina Portobello. The Candlelight is widely used in the Danish culture, to bring the people around you to an intimate and joyful mood.

FUSO

A surface that expresses the multiplicity of our time.
Concrete receives diverse influences and introduces the new again.

Minimalist, but not simplistic. Memories from the adventures of Vikings, the crossing of the Alps, and the strength of Etna are print in matter.

Fuso, diversity of uses and shapes for spaces that have content.

NORD

Orientalism, a cultural movement that influenced arts in the beginning of the XIX century in Europe, was also a reference for Nordic design, which became a synthesis of beauty, simplicity and functionality. The Nordics express minimalism in both architecture and design, creating a language without excess, full of personality, and timeless. Several icons in furniture with Nordic design are as modern today as they were in the 50's.

The Nord line revisits the essential route of minimalism, from the East to Scandinavia. Concrete was interpreted with a flow that simulates the effect of light on the surface, and the result is pure elegance, for timeless spaces that remain modern. Large sizes allow greater continuity and extent for surfaces. Nord is functional for indoor and outdoor areas, for gardens and the entire house.

For a more complete line, now in 120x120 format in external finishing. More alternatives for indoor and outdoor use.

Oh!Take. Master of Brazilian architecture, Ruy Ohtake always takes us to experiences that surprise us.

Going beyond limits, a constant in his creative process, Ruy challenges the possibilities of material and brings out what is unusual.

The concrete and the color. Boldness and genius. When all is said and done, the simplicity and elegance of the work envelops and enchants us.

Here, the work is superficial.

Sometimes flat, almost obvious if it weren't for the subtleties of color and mix of the small aggregates.

Sometimes organic, unusual and vibrant, creating movement in the vertical planes that we ordinarily call walls, but here deserve to be redefined. Now these vertical planes are a blank canvas for the creator's soul. Soul is poetry in concrete, curves and colors challenging boundaries between design and art.

Oh!Take in Slabs close-ups reveals the infinite surface to the eyes. Colors that are timeless and smooth, however remarkable for the strength of their scale, reveal a new path to the design. The master presents us with alternatives to what's obvious, what's gray, and what's common.

Soul – Curves in yellow (Home), blue (Heaven), white (Mountain, gray (Moon), and red (Cliff) in 30 x 120 cm (11.81 x 47.24 inches) format.
Oh!Take Lastras – Infinite colored surfaces that take you to the mountain (Mountain), forest (Forest), cliff (Cliff), city (City), paradise (Heaven), for indoors (Home) and even to the moon (Moon).

OH!TAKE

QATARI

Collective creation. Diverse perspectives, particular experiences on a journey through multifaceted Doha. Views converge in the duality between nature - an immense desert - and the city - intense and pulsating. A minimalist and deep surface, carrying layers and textures that reveal micro reliefs, is interpreted in the tones of the desert and the city. Mosaics bring out bold cuts and patterns that update tiles with cultural roots. Qatari has the purity of the natural, the legitimacy of the collective, and the elegance of the avant-garde.

SALT LAKE

Inspired by the fascinating salt ponds, this collection stands out for the contrast of tones and the fluidity of the oxidized color details, which gives the product a remarkable personality.

The extraordinary color composition of the salt flats changes with the seasons of the year, due to the presence of natural elements that a multiplicity of light tones in early spring, which darken in autumn-winter and become beautiful earthy patterns in summer.

The pieces stand out for their tonal richness and visual textures that beautiful compositions.

SÍNTESE

Brutalist architecture, from daily coexistence with modernist works that crudely reveal concrete.

Pure, just the concrete. Concrete and its marks. The surface. The material. The Synthesis.

A route of projects from Masp to corporate buildings by Slovak architect Hans Broos, which includes the original Parque Portobello Building and Cia. Hering Building in Santa Catarina, made it possible to dive into this architectural language and its marks, printed on concrete.

Archeology as design. The evidence revealed was a reference for the process. Every trace, every crack, every reaction with the steel, every impression of a wooden shape. Finally, a Synthesis. Of design, of technology, of a look that selects and refines.

Síntese is the new Portobello material. Unshakable in revealing herself pure.

SUM

Architecture + Irreverence

Rationality + Innovation

Modernism + Contemporaneity

A sum of strength that expresses the consistency of the design created by Paulo + Nadezhda.

Paulo Mendes da Rocha, a great master of Brazilian Modern Architecture that we admire so much.

Nadezha Mendes da Rocha, designer and architect, a talent that has been giving us strong and sensitive creations.

The tile on a new scale. The starting point of the restless mind and that always finds its way to surmount boundaries. and to dream. Dreaming of tiles. That grow. That fragments itself. That recompose. Artistic panels in pure black and white.

Application in furniture. Democratic, relaxed and everyday coverings. Joy to step and touch. Mosaics that reinvent themselves in elongated elegance.

A sum of technique, art, design with a dream, poetry, and sensibility.

Exponential sum. A sum that multiplies possibilities.

Maxi tiles.

Mosaics.

Earth. Natural. Concrete.

Plots that, added together, are more. More Brazilianness. More modernity. More contemporaneity.

More dreams.

Portobello + Paulo + Nadezhda. Our sum of dreams.

SUPERQUADRA

Concrete is always modern and transitions between many styles without being dated or seeming old-fashioned. It is the perfect companion to a mix of other surfaces and can be the lead in solo projects. SuperQuadra was created from this free perspective of concrete. The Superblocks of Brasilia and its concept of not limiting spaces, creates continuous surfaces with fluidity of motion which inspired the new Portobello concrete.

AMAZONIA

Immensity. Immense trees, immense forests, immense nature. Given all the beauty of this nature, we rescued several species along the way.

Fragments that always bring the history of their trees.

Veins, cathedrals, us. The language of wood.

Given all this, choices. Do things another way. The forest stands.

In ceramics, the story of the trees. From the immensity of the Amazonia to the created surfaces. Intentionally created to cover and express all this strength.

Jequitibá, Muiracatiara, Muirapiranga, Sucupira, Timburi. Immensity of species. Amazonia. Our nature.

ARCA

The rescuing of forests, known through a trip or a story told, awakens the sensation that there is something there that must be preserved.

With this in mind, Arco was created, a gesture to protect, from the impact of time and everything else that could threaten nature's grandeur - a selection of woods that could represent an imaginary forest, with all the woods in the world. It is a simple and ambitious display, that provoked the creative work and a journey to a new surface.

Rescuing woods, discovering new species, enabling them to travel and reuniting a diverse archive of unmatched beauty, is the design challenge. Recreating the woods, intensifying or dampening their markings, finding the best balance of new shades and cultivating a new forest – now material, now a new collection of woods, as result of a process that differentiated it and guaranteed its authenticity.

Arca Nòrdic, from the gradient knots of European Oak to the earthy warmth of the tropical species, a diversity balanced with the soft tones of the light in the region.

Arca Tropical, the diversity of the trees that display themselves with more freedom, under the intense light of the tropics.

Arca Tropical, la diversidad de árboles que se manifiesta con mayor libertad, bajo la intensa luz de los trópicos.

ARAUCARIA

The reproduction of Araucaria, native species of the Atlantic Forest, in the South Region of Brazil.

The surface of the boards has a new texture, developed with the application of quartz micro granules and a special firing cycle. The result is an even more natural touch and a feeling that the wood fibers have a slight relief, which provides more ambiance comfort.

This new surface is available at Araucaria Clara Touch and in the new shade, Araucaria Escura Touch, which reveals brown and almond nuances with less contrast between the wood grains.

AVANTGARDE

Being on the cutting edge of innovation, transcending standards and going beyond the already established, express the avant-garde movement in arts and culture in early 20th century in France.

The power of disruptive ideas to transform something consolidated inspired the recreation of the classic oak, the hardwood of European and American forests. To re oak in porcelain tiles is to overcome design and technology challenges, it is to bring nature to still unexplored levels, it is to combine creative sensitivity with emerging innovation.

Avantgarde reproduces timeless wood in three colors and in super-long format – 20 cm x 120 cm and 21 cm x 180 cm - on a surface where the touch is the protagonist. A texture that defies the material and provokes unexpected sensations is the touch that makes Avantgarde unique.

Super Touch – the new Portobello surface that combines the sensitivity of handmade design with the innovation achieved by technology. Experience this new sensation.

BOREAL

Boreal forests occur only in the northern hemisphere, in a region where the soil is still thawed during the summer. There are few and strong species that make up the flora of this region, such as firs, pines, beeches and birches.

Boreal reproduces a selection of these woods that have the light color with golden nuances and the presence of knots as common characteristics.

There are two versions: Natural that has more homogeneous tones and Mix, where the mixture of intentional tones makes a more rustic counterpoint to this more minimalist proposal.

BOREAL

| Boreal Natural

The color that illuminates and frames other materials is in evidence for compositions that seek warmth in minimalism, a Danish expertise. Vit means white in the Nordic vocabulary and the Vit wood proposes a white surface over a soft Rovere that subtly enriches the purity of color. One of the natural symbols of Finland, a light-color and hardwood tree that reaches 10 to 15 meters high, the Finnish birch is one of the noblest species of temperate forests and has great economic and cultural value to this country, a leading exporter of wood in Europe. The light-colored wood is part of the design and architecture of northern Europe, especially in Scandinavian countries, which mainly use birch to create a "hygge" mood in the environments. "Hygge" is a Danish word that has no translation, and means "to create a cozy atmosphere" and is pronounced ?hu-ga". Bétula is the new Portobello wood, its boards have uniform patterns and no wood knots, which form minimalist surfaces combined with the warmth that comes from the color, a warm and bright color, like the sun of a summer far away from the tropics. A new proposal that upgrades the options for contemporary and fresh layouts.

PARQUET

Diverse species of olive trees, this tree provides us with precious olive oil that grows in the region of Provence, in the southern part of France. Some species are characterized by their exceptional longevity and they produce particular designs from their wooden boards, as there are knots and wide grains in a fairer matrix with very little chromatic variation as these are its main characteristic. They are used by craftsmen and for coverings. Our Parquet D'Olivier is used for internal and external; it is the reproduction of this exotic and noble wood. It allures interior decorators and architects due to its 20x120 format, as well as the being the latest novelty from the Chevron composition.

Canela Dourada

TROPICAL

Inspiration in nature with contemporary aesthetics. A wood in which veins are inspired by winds from around the world. Continuous and fluid, natural tones reveal a light and cozy surface in an urban language.

Scirocco, the wind that takes sand from Sahara to Rome, expresses the most intense tone.

Tramontana brings the winds from northern mountains to a nuance of sunset. Zefiro is the light breeze from the range of colors by Winds. A minimal surface, ideal for indoor and outdoor spaces.

MARBLE
& QUARTZITE

AETERNA

In the tapestry of time, Rome, the eternal city, is a beacon of history and timeless beauty, often expressed through the local marble, Travertine. The classic of perfect proportions, tones, and textures transcends time and is reproduced in a very pure version, based on curation by the discerning eye of design. Aeterna is the contemporary version of noble Travertine slabs, which are no longer available in nature, the technology and design materialize and transform into raw materials for architecture, interiors and furniture.

QUARTZITES

Brazil is rich in mineral formations of quartzites, a very hard rock, with a great diversity of designs and tones and very high mechanical resistance. The advancement of mining technologies is increasingly revealing the beauty of Brazilian quartzites.

QUARTZITES

STORM

Of intense and spectacular beauty. The strong storms lend all the impetuosity of their electrical discharges to compose Storm's identity. The unexpected flashes of lightning are represented in fluid, expressive veins and in grayish tones. The pitch of the skies translates smoothly and elegantly into the solid surfaces.

Storm is the creative interpretation of the real effects of nature into the environments. Predominantly developed within the gray scale - sometimes intense, sometimes timider - the line presents marble with personality, completely filled with outlined designs and in two different finishes: natural and polished. Used on floors and walls, Storm creates dynamic esthetics with its available formats.

In sizes 120x120, 60x120 and 90x90, Storm appears in White and Gray colors. In the Hexa version, the 20x20 piece generates an absolute fascination through its hexagonal shape and the unusual decorative effect it provides.

The collection is complemented by Ply, a relief in porcelain tiles in the 60x120 format where the rhythm connects with the intensity of the surface.

STONE

B.I.S.(BEST INDUSTRIAL STONE)

Best Industrial Stone. Nature inspires. Design creates and recreates. Graphic work overlays different natural stones making an industrial material arise from embossed slate, marble veins and layers of granite on a single surface.

Several stones in the same stone, this is the concept. This surface is for outdoor and indoor applications, B.I.S. surprisingly in cross sections to emphasize the overlaid design.

BARLAVENTO

Barlavento means windward in the nautical dictionary and is also the name of a group of islands in the Caribbean, with parades such as Montserrat, Martinique and Barbados. Atolls formed by coral reefs, volcanic rocks that rolled to the sea and small fossils mixed with sand, paint the Caribbean waters in refreshing shades of blue and green. Inspired by the desire to have nature at home, Barlavento translates into tiles the exuberant beauty of the Caribbean islands. The reproduction of stones in colors that replicate the shades of natural pools features versions for the interior of the pool, outdoor areas and solutions for finishing edges, steps and corners.

BARLAVENTO

| Barlavento Caribbean

BARLAVENTO

Berliner is, literally, an origin description of whom has been born in the capital that transpires history, respects memories and prints movements towards the new, art, architecture and design. Created from the collective and plural vision about Berlin, this new surface reproduces the diversity expressed in the city. Berliner is a combination of natural stone and concrete interpreted in porcelain.

Berlin is a fusion of past and future. Of a certain rigidity with a cool hype spirit. From historic sceneries with contemporary art.

A pulsating culture expresses in multiple manifestations, which were transported to a multi-texture collection, colors that embrace and asymmetries in mosaics and surfaces.

Berliner is intended for the entire house, for all houses, all spirits. A collective creation to embrace the plural contemporary way of our time.

Celtic origin, raw material for other styles, activist personality and diversity mark the history of Folk, the rhythm that inspired Rock n' Roll.

Portobello Folk appropriates these elements for a rhythmic fusion that gives rise to a surprising surface. Natural elements make up a recreated Limestone, a contemporary composition that brings back memories.

Slabs in neutral tones with small fossilized aggregates that are eternalized in a linear rhythm of porcelain tile, which express the elegance of the material.

The sand (desert), fog (ice), and mouse (grey) tones also have an in and out version in 60 x 120 centimeters (23.622 x 47.2441 inches) format Folk, bold and timeless fusion. For all projects with personality.

FREEDOM

Act in accordance with your nature. Free.dom brings, in its essence, boldness and encouragement of freedom. Freedom to be and to feel. Free.dom to and recreate.

Abundant in formats, in characteristic textures and in harmonic tones, the collection awakens spontaneous creativity, to the emotion of the compositions and to personal expression.

Although it presents a set of pieces predominantly designed for outdoor spaces, Free.dom expands the possibilities of use and gives freedom for indoor applications.

Its soft and velvety touch, its minimalist esthetic and its fragmented surface - sometimes lighter, sometimes darker - legitimately recall the natural rusticity of Limestone in the most distinct formats.

In its entirety, the highlight is Tact's inventive and revolutionary technology which, despite its smooth finish, is free to use in and out. The same surface, without roughness, is available in Off White, Ash and Graphite colors, and in the 80x80 size.

In addition to this unusual combination, Free.dom presents: Track, an 80x80 EXT solution with differentiated relief, which plays with lines and volumes, ideal for garages and residential sidewalks; Deck, a 60x60 EXT covering in the three colors of the line; and Rocky, a 60x120 surface with rustic touch relief, for walls with personality.

Free.dom is like this: freedom of possibilities, freedom of choices. It is an incentive to allow yourself and to go as far as your imagination can take you.

HANGAR

The concrete is a mixture of materials that define its technical and esthetic characteristics. The fusion trend fits perfectly with this material, which transforms into new surfaces when combined with natural stone, for example. The fusion of marble and limestone fragments with concrete the Hangar porcelain tiles, a tile that highlights the high performance of the product. For use in residential and commercial environments, Hangar displays the cementitious materials' surface mixed with fragments of natural stones. Innovative and contemporary material for use in the whole house, whether indoors or outdoors.

IPANEMA

An encounter of purposes has motivated the creative collaboration of Ipanema. The new luxury, such as ethics aesthetics, full of environmental consciousness and expression of the authenticity that belongs to the one who creates it, was the initial dialogue turned into new surfaces in porcelain. Ipanema, eternal inspiration.

Ipanema through the creative vision of Oskar Metsavaht. From art to design, from landscapes to geometry.

A particular path built in chromatic compositions. Black and white tones of the little Portuguese stones from the sidewalk translated into big surfaces. The square's sheer geometry or the mosaic's sinuosity, that changes the scale and amplifies the beauty of the famous sidewalks of Rio de Janeiro.

And the colorful palette reproduces Ipanema's natural light. Sun, sea, sand.

Transformed into art and transported for the huge slabs. A luxury. New, authentic and aware.

LALAI

Proper name. Beautiful to say. The perfect raw tone, the fossil fragments in the ideal rhythm, Lalai is unique. Imagination becomes matter.

The first time it was stone, the second time, more serene, just the essence. The beauty that exists. It simply exists. Nothing more.

Lalai is French by origin, with tropical charm and created for the world. Don't be surprised by desire at first sight.

LIVING

MALIBU

The diversity of multicolored rocks is due to the dynamics of billions of years under varied tectonic movements, making the region a barn of slates and sandstones. Malibu interprets the region's coastal atmosphere in reproductions of slates, which are rocks formed in layers of quartz for outdoor and recreational areas. California's unique natural light inspired the billboard with sea and soil tones in formats for balconies, walls, edges and pool interiors. Malibu translates a way of being, a way of integrating architecture and nature.

MS. BARCELONA

Mies van der Rohe, in addition to being one of the leading names of twentieth-century architecture in translating, in a daring, sophisticated and very innovative way, his minimalist austerity, also left some maxims such as "Less is More." The "less is more" may seem simplistic, but it is actually quite sophisticated and elaborate, it is the synthesis of simplicity from quite complex compositions. One of his main works, the German Pavilion made for the world fair of Barcelona, is recognized by the fusion of diverse materials and architectural elements that express in a unique way the "less is more". Ms Barcelona was idealized with the ambition to translate the same thought into a design proposal that, from a fusion of materials like limestones, cements and basaltins, creates a striking but minimalist surface that may use veins and elements of natural stones or cement textures with aggregates, in a chromatic balance that converges to something unique and synthetic. The multi-surfaces, with matt finish, with relief for external use, with the brilliance of the polish, plus the incisions creating textures carved in the material for use in walls, express the versatility of Ms Barcelona. A contemporary view of the layers of time: stone, concrete, architecture, history, technology and design ? Ms Barcelona.

In the heart of a concrete jungle, our home. For the disquiet of urban life, Oasi. Its calm and charming atmosphere redefines our personal refuge and transforms our home into a sanctuary of protection and comfort. From textures that invite touch to the incorporation of technology in the most subtle features, each detail creates the perfect sensation of serenity with a line that embraces areas throughout the home. Combining levity and bright edges with an illuminating palette of three colors for different sizes, Oasi offers a new look at the spaces that we call home.

There are several quarries of "pierres de Bourgogne", which reveal rocks with shades between salmon, golden and fossil fragments composing organic designs.

Pierre Belle is a limestone from the small village of St Martin Belle Roche, South of Dijon and its main feature is the predominance of the directional veins, forming its own graphics.

A great personality with natural or polished surfaces, it can be found in most classic or more contemporary designs.

PIETRA LOMBarda

It is a gray stone with chunks of other rocks in its composition. The name "cepp" in the Milanese dialect means "stone with pebbles" and originated the Ceppo di Gré.

Known as the rock of Lombard architecture, the blocks were brought to town across the river Adda to the Naviglio in Milan to supply the great works of the city.

Elegance and personality cover the surfaces of Pietra Lombarda, which was interpreted in three natural tones.

It's amazing how nature made large multi-shade pebbles to the Pietra Lombarda, a unique material that combines sobriety with a bold and a contemporary spirit, a material that strongly expresses Milanese aesthetics.

SAMBA ROCK

A methodology that transforms dialogue into design.

When meeting with Marcelo Rosenbaum, the material reveals its own rhythm. Samba Rock pays homage to its roots, while at the same time absorbs the new. Two creative teams, two distinct cultures, two vibrant rhythms that harmonize in the form of terrazzo, a material that knows no boundaries.

A surface that beats with the nobility of Brazilian stones – soapstone, Galápagos, Paraná – but reveals a multicultural identity.

In large sizes or in 20x20 options, terrazzo comes to life in off-white, graphite, and green, creating mosaics and new possibilities each time you look. Digital relief technology makes the stone emerge in a dance of textures that invites touch.

Samba Rock. Sustainable terrazzo. An environmental awareness that is not conceptual, it is practical: 25% of the material comes from the circular economy. Nothing is lost – everything is transformed into the beauty needed for the modern home.

TROPEZIENNE

There is something on the French Riviera that exceeds expectations.

The simple, unpretentious, and naturally sophisticated beauty invites you to live each moment to the fullest, embracing the essence of "savoir-vivre."

Natural materials with warm tones, with its origin in this Mediterranean landscape, are part of the architecture and make up the local atmosphere.

Tropezienne dares to bring this French mood of being sophisticated without intention, naturally (très chic), just like the Limestone of the region, to the surface of Slabs and Large Formats.

Fragments of time, on clay as a raw material, reveal in natural tones a compact and contemporary material , based on the new ceramic technologies.

Tropezienne Blanc and Greige boast the color of the sand in St. Tropez under different summer sunlight. The more wintry shade, Tropezienne Cendré, complements the collection's palette.

Fossils and marine sediments characterize traditional limestone. V Stone rescues this millennial material with a timeless French aesthetic quality and mood.

One of the main squares in Paris, Place Vendôme, combines tradition and contemporaneity, and was the conceptual inspiration for this innovative project.

The warm tones of this limestone in addition with a Super Touch surface technology reveal high and low reliefs throughout the piece, highlighting the elements that make up this limestone.

In the natural finish, the line is composed by Off White, Beige and Gray colors. In 120cm x 120cm format.

V Stone, natural surfaces for projects full of identity.

VERANO

The most awaited season of the year: Verano! The season where the days are longer, and the nights are shorter. The season to intensely live and enjoy outdoors. Verano provides an atmosphere that vibrates freshness and a relaxed soul. A stone with a variation of designs and fresh nuances. It can always be summer! With Verano we translate the climate and light of this season for every single day. Indicated for outdoors – for swimming pools – the surface has its shades accentuated with the effect of water and sunlight. In 15 x 15 cm (5.91 x 5.91 inches) format, it also suits indoors areas for more relaxed projects, beyond imagination.

Stone gained a cosmopolitan feel when it was polished in a smooth texture and neutral tones. The delicacy of the surface balances the strength of the material and renews the options for indoor environments.

Via Durini receives this new 60x120 cm (23.62 x 47.24 inches) format (with a natural finish) and 90x90 cm (35.43 x 35.43 inches) (external finish), to enlarge the possibilities of use and sophisticated and timeless environments, like the old world.

WEEKEND

Contemplation of nature is a moment of breathing. Weekend evokes the relaxed atmosphere of summer for a new solution for swimming pools and facades, with options in gloss and exterior finishes. The different tones of the sea on American beaches inspired the colors of the new collection, which ranged from greens to blues with personality and freshness.

ZESTY

Essential and bold, the fusion of limestones and marbles materializes the art and craftsmanship of the ceramist in creating a new material. The strength and intensity of natural stones immersed in the subtlety of ceramics are not accidental; they are the precise exercise of design and boldness in search of the ideal balance.

Zesty is unique, authorial, and tailor-made to be recognized without overshadowing the identity of the project. A proposal to cover all areas of the home, with sculpted surface textures, whether in the natural version or for outdoor spaces. Available in Off White and Light Gray.

A proposal to transcend time, preserve memories, and silently reveal its sophistication.

SYNTHETIC

ART IN PROGRESS

Clay as a blank canvas, pigments as a raw material and ceramics as a technique. Thus a language emerges, geometry in primary colors shines on a rustic base. A moment that becomes eternal, coating with irreverence and its own identity.

A mix of shapes to create vibrant plans that either highlight or blend into the surroundings. Art in Progress is the solution ready for projects that are being imagined now.

ARTFACT

Intentional objects. Objects that tell a story and reveal their origin. The idea of being hand crafted, of imperfection, forged by fire and natural forest tones, was translated into material and technique. Industrial surfaces to be coated with strength and meaning. Surfaces to express the randomness of shape, the unprecedented, which make ceramics as beautiful as they are unique.

Artifact immortalizes the artisan's discoveries in a collection of elongated, thickened coatings, with organic edges and different chromatic color intensities.

FOLIA

That obvious question about the concept behind a collection doesn't fit here. Not because of a lack of content, but because Folia creative process goes beyond a simple story. We asked Isay to develop a collection for Portobello. We tested compounds, materials, enamels and firings in a trial-and-error process that not only guided Isay in adjusting the design of the pieces, but also guided us in the search for technological innovations that would make their production viable. Folia includes thin and very large plates, and the diffuse coloring has something ludic and irreverent.

The Gávea Stone provides incredible views, both for those jumping and risking beautiful flights, and to those who just watch the world from there. Such views were the reference for a new relief in cement material for walls and facades. Asa Delta and São Conrado are proposals which ensure a 3-D element to the vertical surfaces.

GOUACHE

The movement of the brush reveals nuances and forms surprising layers of color. The smooth relief surface intensifies the color and highlights the beauty of the technique.

Thirteen shades with different depths and the charm of gouache painting invite chromatic compositions, a mix of formats and surfaces, and productions made with decorated accessories.

Gouache is a color system for all environments, pure raw material for creative spirits!

HAPTIC

Haptic, in collaboration with Vik Muniz, is a tile collection by Portobello that celebrates the creative process and the beauty of art. Inspired by the texture of paper and the vibrant colors of watercolor, the collection offers porcelain tiles that recreate the tactile and visual experience of these materials.

With large formats and reliefs that vary in intensity, Canvas Light and Canvas Intense evoke the different weights of paper, while Aquarelle, with its colorful bricks, brings the explosion of watercolor hues.

The Haptic collection invites an immersion into the creative universe, transforming spaces into true art galleries.

HIGHLANDS

An aquarelle-inspired surface with toned-down nuances, inspired by the Great Lakes region in the South and the Tennessee area. It is reproduced in artisanal ceramics with fluid reliefs.

The color palette interprets the four seasons of the American landscape, ranging from cool tones to warm tones, mirroring the transition from winter to summer.

Highlands is a customization element that traverses the walls of the entire house, both in balconies and in gourmet spaces, living rooms, powder rooms, and bathrooms.

HORIZONTES

Traveling is much more than getting from one place to another.

The real art of exploring the world is not attached to a plane ticket but to the burning desire to understand other points of view, accept what seems different, absorb new realities, look within ourselves, satisfy our curiosity, and expand horizons.

After visiting more than 60 countries, the journalist and architect enthusiast, Pedro Andrade shares some of his physical and emotional adventures with us.

Through a collection inspired by the colors, textures, landscapes, flavors, and peoples from five different cities, he goes back to these places, however, this time by our side.

HORIZONTES brings pieces that can transport the essence of Jaipur, Santorini, Tulum, Zanzibar and - of course - New York into a familiar reality.

The world, inside our home.

Bon voyage.

KREA

This deceptively simple, opaque wall tile provides nearly infinite possibilities. The flat textured fields, alongside complementary color choices allow combinations for all environments.

The modern-stretched subway size contrasts delightfully with the naturally inspired texture subtle earth-toned palette, creating an inviting yet refined back*DROP* for any space.

LIVERPOOL

The history of rectangular wall tiles for wall coverings was employed even in the 19th century in The Tube, the name of the underground (subway) in London - that was the inspiration for the Liverpool line, a very contemporary reinterpretation of that material. There are basic and neutral colors in color options on a glossy surface with subtle embossments to *UPDATE* the original version of the wall covering in one of the first London underground (subway) stations, Liverpool.

PURAFORMA

A timeless encounter of monochromatic tones, where versatility is the dominant note and the reliefs are the true protagonists. With long, tapered lines, they connect with all spaces. In a matte finish, the textures awaken a smooth and sophisticated dynamism. And the incessant movement, provides amplitudes like true visual decorative choreography. Puraforma is creative rhyme, it is an encounter of possibilities. An authentic expression of a beautiful aesthetic with technical and formal accuracy.

SUNSET

The sun presents itself in a unique way in different destinations around the world, providing a fascinating natural spectacle that never repeats itself. The particular atmosphere of the sunset inspired us to idealize scenarios and environments for leisure time.

Sunset features a surface specially developed for application in swimming pools. The motion of the design and the variation in the product's tonality stand out against the water to reveal a surprising effect.

The five colors available in the 14.5x14.5 format wander through shades of green and blue and provide a refreshing mood in perfect balance with nature.

SURFACES

Color system and formats for architectural surfaces.

The redesign of small formats brings essential features to the architecture of our time.

Two squares and two rectangles with 25 different colors especially designed for large plans, such as facades, internal panels and pools.

To enhance the colors, the edges got straighter, minimizing shadows caused by the bold edge. The finishing is super matt, decreasing the reflection which distorts the colors. The joints are smaller, reducing the grouting area. A grout palette of colors to harmonize or contrast with the new system is part of this solution.

Surface is pure color, with technical advantages of ceramic coating. Ease installation with the bel-point system. Everlasting color. Low maintenance. Portobello design.

Surfaces is the color as raw material for creativity in architecture. Explore this new universe of colors and formats.

VERRE

Transparency reveals the new vintage.

Post-war industrial glass translated into two versions: One with a more subtle relief, and another that reproduces the fluted pattern.

Small rectangular pieces composed of pieces in 30 x 60 cm (11.811 x 23.622 in.) for walls reinterpret the French frames of the time and allow for a retro touch in contemporary environments.

Verre. Because walls need manifestation.

In a long and remarkable historical passage, Vivant lands in the contemporaneity of enthusiastic and sophisticated homes. Inspired by the French artistic movement, which emerged at the end of the 19th century - Impressionism was a symbol of a time when paintings portrayed landscapes, highlighted the relationship between space and light, and sought to awaken sensations.

Vivant is powerful, radiant and full of life, adding its vintage esthetic to the modernity of a palette rich in tones that transit from neutral to colorful. The tones are based on gray, resulting in its unique personality palette.

Among the ten color possibilities, the glossy, matt and Ligne embossed finishes are also protagonists and a true invitation to touch.

Vivant's surface dances to the rhythm of the light, reproducing a charming movement.

Vivacious, resistant and versatile, Vivant covers internal walls and is presented in 10 colors in the 7x24 format.
